

Financial Benchmark

Coach'In needs a persistent backend, managed database, object storage, and CDN in one ecosystem. Three providers compared:

Criteria	AWS	OVHcloud (FR)	Vercel
App Server	t3.medium ~\$30/mo on-demand; ~\$18/mo reserved	VPS Comfort ~€13/mo (2 vCPU, 4 GB)	No persistent server — serverless only
Managed DB	RDS t3.small ~\$26/mo	Managed PostgreSQL from ~€12/mo	Relies on 3rd-party (Supabase, PlanetScale...)
Bandwidth	\$0.09/GB egress (costly at scale)	Unmetered on most VPS plans	1 TB included on Pro plan
CDN	CloudFront built-in, 1 TB free/month	No native CDN — use Cloudflare (free)	Built-in global Edge CDN
GDPR	EU regions available (Paris, Frankfurt)	HQ in France — not subject to US CLOUD Act	EU routing available, limited control
Scaling	Auto Scaling Groups, ECS — gold standard	Manual upgrades or managed Kubernetes	Instant serverless — no persistent backend
Verdict	✓ Selected — best full-stack integration	Strong EU/GDPR alternative for v2	Excluded from backend scope

Decision **AWS** selected. Coach'In requires a persistent API, managed relational DB, object storage, CDN, and load balancer in one integrated ecosystem. AWS provides the deepest coverage. OVHcloud is noted as a cost-effective EU-compliant alternative once the product matures.

Criteria	Auth0 (Okta)	Firebase Auth (Google)	AWS Cognito
Free Tier MAU	25,000	10,000/month	50,000/month (most generous)
Paid pricing	Essential ~\$35/mo (500 MAU + MFA)	\$0.0055/MAU after free tier	\$0.0055/MAU after free tier
Social login	Unlimited on free plan	Facebook, Google, Apple — free	Built-in but fewer providers
At 10,000 MAU	~\$186/mo	~\$0 (within free tier)	~\$0 (within free tier)
GDPR	EU storage available, SOC2, ISO27001	GCP EU regions available	AWS EU regions
Verdict	✓ Selected for MVP (25k free MAU)	Best cost alternative for scale	Fallback if staying 100% AWS

Decision **Auth0 Free Tier** for MVP. Migrate to Essential/Pro as the user base grows, or switch to Firebase Auth for better pricing at scale.

Criteria	Stripe	PayPal / Braintree	Adyen
Online fee (EU)	2.9% + €0.30	3.49% + €0.49	Interchange + ~0.3% + €0.10 (negotiated)
Marketplace payouts	Stripe Connect: \$2/active account/mo + 0.25%	PayPal Payouts: 2% per transaction (cap \$1)	Supported — volume pricing only
Monthly fee	None	None	None (min. volume required)
Dev experience	Best-in-class SDKs & docs	Good — widely familiar	Complex — enterprise-oriented
Verdict	✓ Selected — best marketplace fit	Consumer-friendly alternative	Not suitable at MVP stage

Decision **Stripe + Stripe Connect**. Most complete marketplace payout infrastructure, transparent flat-rate pricing, and easiest integration for a fast-moving team.

Coach'In needs a professional logo and animated sport exercise illustrations (e.g. squat form, swimming technique). These are one-time creative investments.

Item	Budget Freelancer (Fiverr/Upwork)	Mid-tier Studio	Premium Agency
Logo design	€300–600 (incl. SVG + brand guidelines)	€800–3,000	€3,000–10,000+
Exercise animation (per 30s clip)	€500–2,000 (2D, Lottie format)	€2,000–5,000	€8,000–25,000+
Pack of 10 animations	€4,000–8,000	€15,000–40,000	Not feasible at MVP
Turnaround	1–3 weeks per clip	2–5 weeks per clip	6–12 weeks
Verdict	✓ Selected for MVP	Target for v2 / post-funding	Not suitable at this stage

Tip — use Lottie format for animations. Lottie (JSON from After Effects) renders natively in React Native and browsers without video playback overhead. Files are tiny vs. MP4, reducing S3 storage costs and CDN egress significantly. Always request Lottie output from your animator.
